Datasheet: VMA00274KT

Description:	DNAJA2 ANTIBODY WITH CONTROL LYSATE
Specificity:	DNAJA2
Format:	Purified
Product Type:	PrecisionAb™ Monoclonal
Clone:	OTI3A11
Isotype:	IgG2a
Quantity:	2 Westerns

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/1000

PrecisionAb antibodies have been extensively validated for the western blot application. The antibody has been validated at the suggested dilution. Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Further optimization may be required dependant on sample type.

Target Species	Human
Species Cross Reactivity	Reacts with: Mouse, Rat **N.B.** Antibody reactivity and working conditions may vary between species.
Product Form	Purified IgG - liquid
Preparation	20µl Mouse monoclonal antibody purified by affinity chromatography from ascites
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN_3) 1% Bovine Serum Albumin 50% Glycerol
Immunogen	Full length recombinant human DNAJA2 (NP_005871) produced in HEK293T cells
External Database Links	**UniProt:** O60884 Related reagents **Entrez Gene:** 10294 DNAJA2 Related reagents

Synonyms	CPR3, HIRIP4
Specificity	**Mouse anti Human DNAJA2 antibody** recognizes the DnaJ homolog subfamily A member 2, also known as HIRA interacting protein 4, HIRA-interacting protein 4, cell cycle progression 3 protein, cell cycle progression restoration gene 3 protein, dnaJ homolog subfamily A member 2 and renal carcinoma antigen NY-REN-14. Encoded by DNAJA2 gene, DnaJ homolog subfamily A member 2 belongs to the evolutionarily conserved DNAJ/HSP40 family of proteins, which regulate molecular chaperone activity by stimulating ATPase activity. DNAJ proteins may have up to 3 distinct domains: a conserved 70-amino acid J domain, usually at the N terminus; a glycine/phenylalanine (G/F)-rich region; and a cysteine-rich domain containing 4 motifs resembling a zinc finger domain. The product of DNAJA2 works as a cochaperone of Hsp70s in protein folding and mitochondrial protein import in vitro (provided by RefSeq, Jul 2008). Mouse anti Human DNAJA2 antibody detects a band of 46 kDa. The antibody has been extensively validated for western blotting using whole cell lysates.
Western Blotting	Anti DNAJA2 detects a band of approximately 46 kDa in HEK293 cell lysates
Instructions For Use	Please refer to the PrecisionAb western blotting protocol. For additional information on secondary antibody dilution and exposure time see product web page.
Lysate Composition	400µg HEK293 lysate lyophilized in RIPA buffer.
Lysate Reconstitution	- If using DDT reconstitute the lyophilized lysate with 190µl DI H_2O, add 200µl 2x Laemmli Sample Buffer and 10µl 2M DTT. - If using BME reconstitute the lyophilized lysate with 180µl DI H_2O, add 200µl 2x Laemmli Sample Buffer and 20µl BME. Heat at 95°C for 5 minutes. For 10 well mini gels load 25µl. For other gel and comb formats please refer to the PrecisionAb western blotting protocol.
Storage	Antibody: Store undiluted at -20°C, avoiding repeated freeze thaw cycles. Lysate: Store lyophilized lysate at -20°C. After reconstitution aliquot and store at -20°C for up to 3 months or at -80°C for longer term storage.
Shelf Life	As supplied, 12 months from date of despatch.
Acknowledgements	PrecisionAb™ is a trademark of Bio-Rad Laboratories.
